MANISH KUMAR CHOUDHARY

Software Engineer | Java Backend Developer

+91 8955946276 | cmanishkumar193@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFESSIONAL SUMMARY

Software Engineer with 2+ years building production backend systems in **Java** and **Spring Boot**. Own **15+ microservices** powering REST APIs on a live platform, with hands-on experience in **Apache Kafka**, **Elasticsearch**, **Redis**, **MySQL**, **Spring Data JPA** and **Docker**. Focused on building scalable, fault-tolerant distributed systems.

TECHNICAL SKILLS

Languages: Java, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT AuthN & AuthZ

Databases & Search: MySQL, Redis, Caching, Elasticsearch

Messaging: Apache Kafka, Event-Driven Architecture, Asynchronous Processing

DevOps & Tools: Docker, Git, GitHub, Maven, Linux

Architecture: System Design, Distributed Systems, Microservices Architecture, Spring Cloud Gateway, API Gateway, Eureka Service Discovery, Job Scheduling, Concurrency Control, Scalability, Fault Tolerance

PROFESSIONAL EXPERIENCE

Platform Commons | *Software Engineer* *Bengaluru, India* *May 2024 – Present*

- Design and maintain **15+ production-grade microservices** in **Java** and **Spring Boot**, delivering scalable REST APIs for the VMS (volunteer management) platform.
- Reduced API response latency by **25%** through query optimization and **Redis** caching, with data persisted in **MySQL** via **Spring Data JPA** and **Hibernate**.
- Integrated **Elasticsearch** indexing across large datasets, cutting search retrieval latency by **40%**.
- Introduced event-driven service communication using **Apache Kafka** to decouple services and enable asynchronous processing at scale.
- Built an internal **distributed job scheduler SDK** that prevents duplicate job execution across service instances, adopted as a drop-in dependency by other teams.

Zeetron Networks | *Research Intern – Data Science & Machine Learning* *Jaipur, India* *May 2023 – Jun 2023*

- Built and evaluated **machine learning models** in **Python** using **Pandas** and **Scikit-learn** for data-driven insights, visualizing datasets and model performance with **Matplotlib** to improve interpretability of results.

KEY PROJECTS

ClearDocs – Document Verification Platform | GitHub *Oct 2024 – Apr 2025*

- Built a document verification system using **Spring Boot**, **Kafka** and **Elasticsearch**, performing real-time file integrity checks with **hash-based verification** to reliably detect tampering.
- Used **Elasticsearch** indexing to speed up document retrieval and **Kafka**-driven asynchronous processing to reduce end-to-end processing time.

Peer Vault – Decentralized File Storage (Microservices) | GitHub *Jul 2024 – Sep 2024*

- Architected a **microservices** system with **Spring Boot**, **Spring Cloud Gateway** and **Eureka Service Discovery** for scalability and fault tolerance.
- Integrated **IPFS** for decentralized storage, removing single-point-of-failure risk, and containerized services with **Docker** with automated API Gateway routing.

Form Fusion – Full-Stack Form Builder & Analytics | GitHub *Jan 2024 – Feb 2024*

- Built a full-stack form creation and analytics tool with **Java**, **Spring Boot**, **ReactJS** and **MySQL**, secured with **JWT authentication** and email verification to protect user access and data.

EDUCATION & CERTIFICATIONS

B.Tech., Computer Science & Engineering – Jodhpur Institute of Engineering & Technology *CGPA 9.8/10 | 2025*

Higher Secondary (RBSE) – Noble Senior Secondary School, Falna *100% | 2021*

Secondary Education (RBSE) – Adarsh Vidya Mandir, Rani *96.5% | 2019*

Certifications: Year Topper, B.Tech. CSE (2023) | Java Development Internship (2024) | SAS Programming 1 & 2
